

# Folding

For easy transportation

1. Lay your carrier out flat, main side up. Ensure hood is folded down over body.

2. Fold shoulder strap across body.

3. Fold the remaining length of the strap back and forth in a concertina .

4. Repeat for the other shoulder strap.

5. Roll the body down over the straps.

6. Continue rolling the carrier until you reach the waistband. Fold the webbing (or waist ties) over the bundle, and clip (or tie) to secure.

This method is ideal if you are not going to be using your carrier for the entire length of the outing. Instead of using a storage bag, the carrier can simply be slung over your shoulder until required.
